New Features

Fixes and Improvements

5 September, 2022

## Connect for macOS 3.6.0 Release Notes

macOS 3.6.0 is primarily a maintenance release with some new features.

The release schedule is:

### Release 1: 5th September

- Beta-AU
- Beta-NZ
- Beta-UK (Early Beta)

### Release 2: 8th September

- Beta US

### Release 3: 13th September

- EA-AU
- EA-NZ
- EA-UK (Stable 2)

### Release 4: 19th September

- GA-AU
- GA-NZ
- GA-UK (Stable 1)

### Release 5: 21st September

- EA-US

### Release 6: 29th September

- GA-US
- Consumers (Parent Customers)

Please follow our maintenance updates [here](#).

**Warning:** This update will require users that have manually installed Connect to allow the

required security and privacy permissions. If users do not accept permissions, filtering will be disabled.

## New Features

- We added Live View. Teachers using Classwize can now live view the student's screen when they're using macOS. This will be released and launched by the Classroom Product team.

## Fixes and Improvements

- Upgrades to the agent filter to improve performance and stability.
  - We improved the enrollment process.
  - We resolved some minor defects.
-
